Thellio as a company

Thellio is a Swedish company located in Karlskrona, one of the headquarters of the Telecom industries in Sweden.

Together with its sister company Cogitel we have delivered cloud-based software products for the IoT- and Telecom industries since 2010.

While our competitors talk about IoT as the industry game changer, we have been working with this for over a decade.

Thellio

Cogitel
Because Experience Matters

We know IoT can be easy.

What is Thellio

Does your business want to connect your assets but lack the knowledge of how to do it or don't want to invest time and money on a full development project?

If so, Thellio is the obvious choice for you. By offering a hassle-free, cloud-based, easy configurable and flexible product you could be up and running in no time.

Since Thellio is a cloud-based service all the connected devices can be monitored and managed by the web-based customer portal. No need to install or maintain any software.

Thellio is easily configured for your specific needs and looks, such as branding and what type of data to be visualized. All to be an integrated and natural part of your value chain.

You own your asset data and only pay for the license to use Thellio. This gives your business access to all the latest features and don't have to care about development or maintenance, **IoT as a service**.

Thellio Application

↕

IoT Provider

↕

IoT Device
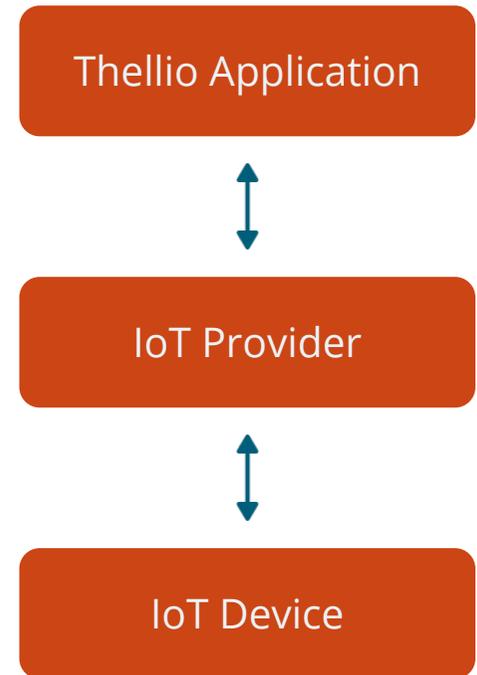

Architecture

Thellio is built with core components from Amazon Web Services, AWS, who is the global leader in cloud-based services. By using their components instead of building our own we could take advantage of the flexibility, security, scalability and high-performance it offers.

Using AWS allows us to spend more time on building modules that will support your specific needs and make Thellio the obvious choice for your business.

Partners

Telenor IoT / MIC

Together with our partner Telenor IoT we offer you a complete IoT experience.

Telenor Connexion provides global connectivity together with the cloud data platform, Managed IoT Cloud. With a long history in M2M communication and IoT they have built pioneering IoT software and systems, some of which have become industry standards.

Adding Thellio on top gives you an easy-to-use interface that helps you get closer to your business.

Partners

WITTRA

Together with our partner WITTRA we offer you a complete IoT experience even for areas with weak connectivity.

WITTRA wireless sensor network kit enables users to connect, sense and locate their assets in the toughest environments such as heavy industrial sites and areas of weak connectivity.

Adding Thellio on top gives you an easy-to-use interface that helps you get closer to your business.

Partners

Induo

Induo provides innovative IoT-products that bridges all distances. Induo's focus is to provide the best possible hardware, so companies can maximise their competitiveness and reach their goals faster.

Together with Thellios powerful platform, we can provide an end-to-end IoT solution that is secure, scalable and flexible.

IoT built for many business verticals.
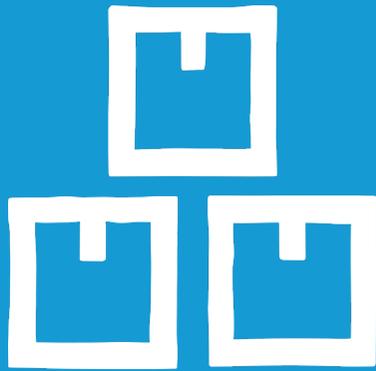

Industries

Control your assets remotely. See where they are located and where they have been. Get a living inventory of all your assets.
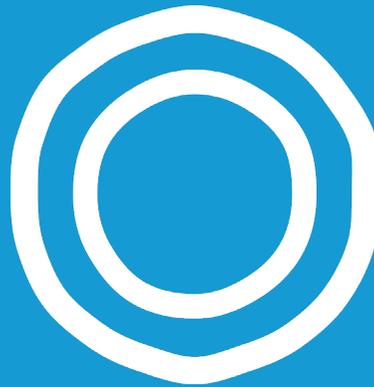

Spaces

Modernize your spaces by making them connected. Monitor temperature, moisture and the number of visitors among other things.
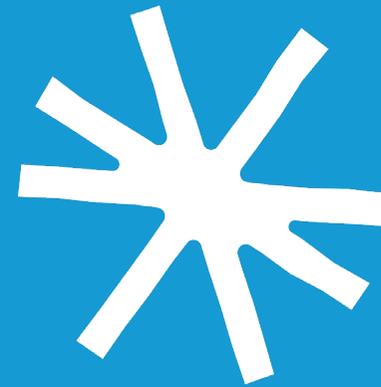

Custom

A custom IoT multi-tenant platform, powered by our IoT application core.

Tracking

Thellio helps you to keep track of your assets and view their locations in the built-in map.

By adding your own indoor map in Thellio you can track your assets both indoors and outdoors. You could even see at which floor it is located!

From the map you could click on the asset and get to a more detailed view.
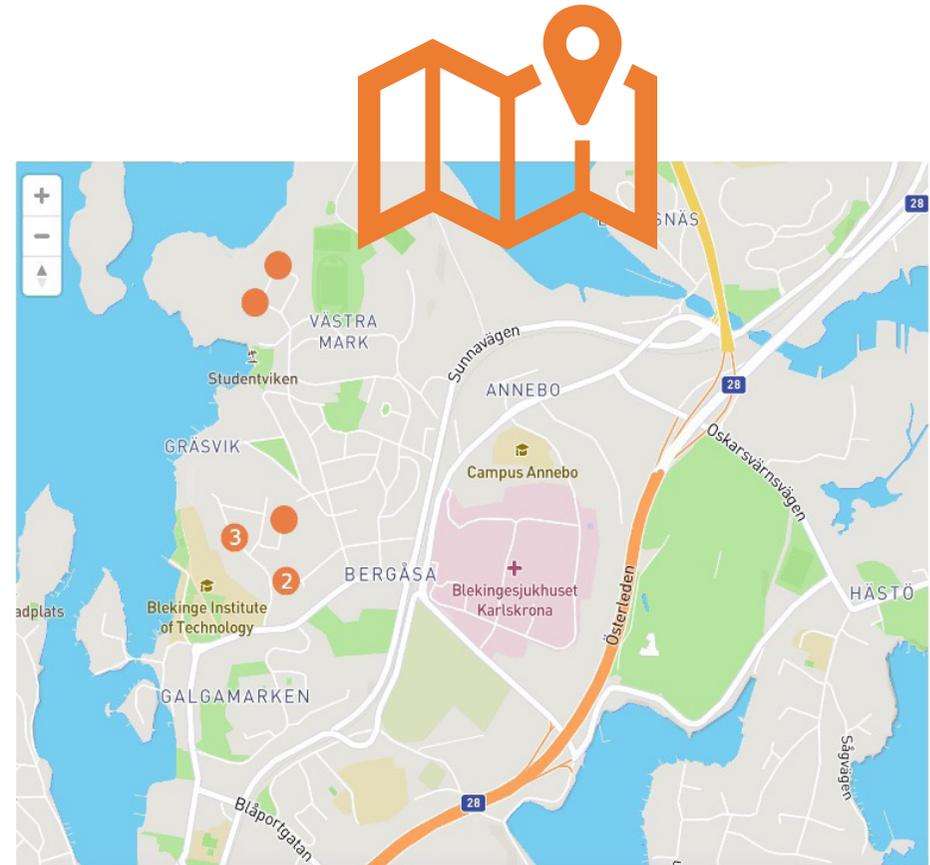

Health check

With Thellio health check you can monitor your assets health.

Locate them on the map, see current status, temperatures, if they are running, for how long and how often.

If the asset has an alarm set and the alarm gets triggered, you will get notified in the portal.

Are you on the fly or want the service technician to get notified instead it is possible to send the notification by SMS or e-mail.

Setup, Administration and Branding

With Thellio you get access to an administration part of the portal where you can manage your, or your customers, users, organization and assets.

You can brand Thellio with your organizations colors and logo to make it feel more like home. Or you could just stay with the stunning default theme.

All of this at your fingertips and accessible from anywhere in the world.
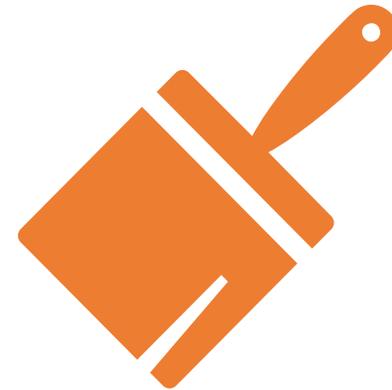

Organizations

With Thellio it is easy to setup organizations. You can create multiple groups within your organization and connect users to more than one group. Perfect for the service technicians that needs access to several groups.

Of course it is built with security top of mind, making sure that information isn't spread between groups and organizations.

Why Thellio

- **Fast & simple setup** – get started in no time without doing any coding.

- **Scalable** – scales with your needs.

- **Reliable & Secure**– built with well known component from world leading vendors.

- **IoT as a service** – with a license you get access to all the latest features and updates.

- **Pay as you go** – consumption-based payment.

Thellio - **We know IoT can be easy.**

Responsive design for multiple platforms.
